To Whom it may Concern:

I would like urge you to vote no on bill #HB3063. It is my strong conviction that all medical decisions be made between the patient and their own physician, without government intrusion. Any medical decisions regarding ones children should be made by the parent, with the input of their personal physician. Please vote no on bill #HB3063 to protect parental rights to work with their doctor to choose what is best for their own children. Thank you for your consideration.

Respectively, Ruth Woodard
