I strongly oppose HB 3063. Vaccine safety is not established. Where there is risk, there also must be choice. If Children are excluded from public school based on individual medical decisions, there will be lawsuits and fiscal consequences. This bill is bad policy based on a very small percentage of Oregonian residents (2.6% exemption rate).

I urge you to make the right decision based on liberty and individual rights. Do not pass HB 3063.
