Subject: House Bill 3063
Date: Friday, March 1, 2019 3:32:17 PM

I am an Oregon citizen and I do not approve of House Bill 3063. Adequate double-blind studies have not been done to give Oregon citizens the assurance of vaccine safety. Until double-blind studies are carried out on each ingredient in the immunizations, the vaccine in question should not be administered to a human being. The science simply has not convinced the public of the SAFETY of the growing numbers of immunizations. Additionally, I will never approve a Bill that forces a human being to have heavy metal, known carcinogens and aborted fetal cells injected or ingested inside their body. I cannot put into words the grief that I feel for those who will be negatively impacted by the passage of this Bill.

Of my seven grandchildren, the vaccinated ones are far less healthy than the un-vaccinated. Three of my grandsons have speech impediments and have been on behavioral drugs their entire childhood and the one granddaughter who submitted to vaccinations has had numerous ear tubes and is now going deaf as a young lady. Further, I have witnessed babies in my community who had reactions to vaccinations and feel extremely saddened that the passage of House Bill 3063 would force more children to become chronically ill or die.

According to the United Nations, the United States is 92nd in health. This compared to 204 other countries is absolutely unacceptable. We as Americans should be increasing the lifespan of our youth, yet House bill 3063 will in fact, contribute to the problem, shortening the lives of many more children – children whose parents have researched the pros and cons and actually read the insert on the vaccination package. These educated parents determined for their child the inherent risks and they should retain their right of choice.

In light of the information that you have before you by the many, many testimonies, if you push House Bill 3063 into law, it would be a tragedy. **I stand for freedom of choice.** I have never tried to force parents into not vaccinating their children and I will never support a Bill that forces parents into vaccinating the children against their better judgment.

Please make Oregon laws that *protect the rights of parents to choose what immunizations, if any, that they may choose for their child, regardless of health conditions, medical diagnoses or religious convictions.*

It is your duty to represent the voice of the citizens, NOT big pharma. Please represent my voice and the voice of parents everywhere by failing House Bill 3063.

Thank you very much!

SueAnn Small-Collver
