I'm writing to let you know that I am opposed to HB3063.

I am opposed because I am the father of a son who had an increasingly violent reaction to the Tdap shot as a baby.

I am opposed because our representatives fast-tracked a public hearing on HB3063 with this idea of removing all personal exemptions from childhood vaccinations (with no limits on new ones being added at any time). With only a few days notice to the public (and during record snowfall in the state) this appears to an attempt at a sneak vote behind the backs of Oregon voters and all because of 4 measles cases in Oregon??!

I also oppose HB 3063 because mandatory mass medication is not only a very bad idea that should be unconstitutional but because it leaves us all a hair's breadth away from some dystopian future of a government enforced medicated population—which greatly disturbs me.
