

Hello,

I oppose bill HB3063. I'm a parent of three and made the educated decision to not vaccinate my children. My decision is not based on the work of Dr. Wakefield. It is based on the information I gleaned from the CDC, through their website, links they provided, and direct correspondence.

My decision is science based. This bill is not science based. It is based on fear and is an overreaction to a handful of measles cases.

This bill bullies families. It removes the rights of children to an education. As a tax paying parent, I should be able to have access to public education for my children.

Passing this bill will awaken a sleeping giant. Parents who choose not to vaccinate are passionate and educated. We will rise and fight this. We will educate our friends, neighbors and anyone who will listen. Currently, we have been silent. We exercise our rights and respect the rights of those who choose to vaccinate. We are asking to have our rights respected.

Do not pass this bill.

Respectfully,

Michelle Wallman
