Subject: I oppose HB3063

Dear Sir/Madam,

I am writing on behalf of my and my family to oppose bill HB3063. This bill would violate 1st amendment rights. The 1st amendment was created first, because it is the most critical element to our democracy. It's what defines our country and our freedom. This constitutional violation or questionable violation is at the cost of mandated vaccines. This is a difficult topic for anyone to discuss, and most people have not done the reading required to dip a toe into the ocean of information available from both sides. It's very difficult to find accurate information on either end. To be fair to this process, please ask yourself "What objective research you have I done". Have you looked at both sides of the equation in depth? I found, when I asked that question, I hadn't done the homework in order to have an informed conversation. I also found it to be very difficult to sift through all of the information available. I am not for or against vaccines, but I am educating myself so I can make the right choice for me and my family. I'll end with the one truth I have found, and that is both Vaccines and Disease have the ability to hurt people long term. Look at both sides, objectively, and I think you'll find this is a decision you do not want to mandate.

Thanks for your time and consideration.
