Subject: HB 3063 testimony

I oppose HB 3063 as it will take away my children's right to attend public school. I have first hand seen permanent harm caused directly from receiving the mmr vaccine. Days after the vaccine the 2 year old child who prior to the shot could laugh, talk, smile now was unable to speak. She wouldn't laugh. She would no longer smile. I have no intention of putting my children at that risk. I strongly feel the negative side effects of some vaccines are far worse than the diseases themselves. My children should still be allowed to attend public school even though I don't want them vaccinated. Thank you.
