Subject: HB 3063 testimony

Hello,

I'm writing to oppose HB 3063.

Reasons-

-Aborted babies are used in multiple studies to test the vaccines . link Below shows the proof. Stanley Plotkins admits he used 76 aborted babies in just one study.

-Vaccines have never been through a true placebo safety test.

-inserts of vaccines clearly state the risk of vaccines, including death, seizures... It's a lie that vaccines are safe and effective.

If vaccines were actually safe with no side effects- medicine should still be a parents choice, but were not even talking about a safe product.

Please ask the CDC to do a comparison study on who's healthier- vaccinated kids or unvaccinated before this can even be voted on. We need more scientific evidence that these vaccines are safe before this program goes any further.
