

Hello,

I strongly oppose HB 3063. I do not believe that certain groups of children (those with infectious diseases such as HIV or Hepatitis, illegal immigrants, violent children) should be protected while other groups of children (unvaccinated/partially vaccinated) are excluded. Every child should have access to a free and public education regardless of faith or religion. This bill is coercive and just plain wrong.

Please kill this awful bill!

Sincerely,

Christina Huff
