

Hello,

I am writing to tell you that i oppose HB 3063, the bill to end all non medical vaccine exemptions for oregon school children.

Vaccines contain mercury, formaldehyde, aluminum, polysorbate 80, cell lines from aborted fetuses, tissue from hamsters, dog kidneys, monkeys, peanut oil adjuvants and much more ingredients that go against my religious beliefs.

Children should have access to education regardless of vaccination status and parents should retain their rights to refuse vaccinations without being coerced.

Oregon has a rate of ONLY 2.7% of school children that hold a philosophical or religious exemption. PLEASE do not support this and take away our choice!!

I hope you will not support this bill along with me!!

Thank you for reading,

Jamie Burcham
