

Hello,

I am writing to express my firm opposition to HB 3063. I am not an "anti-vaxxer". My family cares about herd immunity and community responsibility, and my daughter has received many vaccines, including her MMR, DTap and others.

However, under the educated guidance of our pediatrician and ourselves, we have not received EVERY vaccine on the schedule. Some of them simply do not apply to our family or our daughter, or to protecting the community. There are MANY developed nations in Europe and around the world that follow the alternative vaccination schedule we have chosen.

This is not a black and white, all or nothing, pro or anti issue. It is wrong and immoral to force families to give their children medications that do not apply or make no sense to their family community's health.

Thank you,  
Stacey Ludlow
