

Dear Oregon Legislatures,

I'm writing today to oppose House Bill 3063. I'm not anti or pro vaccinations, I'm writing because I believe in medical freedom in this country and every child's right to a free education. Once you strip a parent of their right to decide any medical decision (especially one's with inherent risks), the fundamentals of what this county was founded on, are gone.

I believe Oregon will lose millions of dollars when families flee to a place where medical freedom still exists. We cannot take that risk, especially over a few cases of the Measles. We cannot let pharmaceutical companies run this state or country. We must take a stand and allow parents (along with healthy professionals) to decide what is best for their child.

I appreciate your time in reading this and I trust Oregon Legislators will make the correct decision and oppose HB 3063

Thank you,
Faye
