

No on Mandatory Vaccines!

We have a right to make decisions about our bodies and our children's bodies.

You cannot force us. Don't undermine our own authority about our own bodies.

I am not against vaccines, but I am not ok with the onslaught of crap that is in those vaccines to be administered into a newborn's body.

We are on a delayed schedule with my 12 year old and intend to eventually get all the vaccines. Now that he is older I am ok with it - but over time! Not all at once.

Can you guarantee there is not harm done to children? NO!

Our bodies, our choice.
