---

To Whom It May Concern:

I am writing in support of the proposed Senate Bill 558. This bill will allow local governments the ability to better moderate speeds on their residential streets. Speeding has become a big problem in many communities throughout Oregon. As a board member of my neighborhood association, one of the major concerns my neighbors share is speeding on our residential streets. In fact, our association is currently supporting a grassroots campaign titled "Please Slow Down; It's Our Town" with the goal of slowing traffic. Passage of a bill like SB558 will help our city leaders here in Bend better address these speeding concerns and make it easier to lower speeds where needed. Please support this bill and give municipalities the tools to make their city streets safer for their residents.

Sincerely,

Sarah Spernak

Bend, Oregon
