

March 1, 2019

Dear Oregon House Legislators,

I am a parent and a Ph.D. in psychology (Yale University, 2009). I am writing in support of House Bill 3063. As a university professor, I believe that given the general public's lack of scientific literacy as well as the pressing health concerns presented to the population by unvaccinated children, House Bill 3063 is a necessary step to take, and I'm grateful to you for taking up the issue.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Louisa C. Egan Brad". The signature is written in a cursive style with a large initial "L".
