

I am Mckenzie Banda and I oppose HB 3063. I do not believe a child should be excluded from schools because the parent chooses to exempt said child from one or more vaccines due to religious or philosophical reasons. Many vaccines contain aborted fetal DNA as well as many other neurotoxins and harmful chemicals such as aluminum, formaldehyde, monkey kidney cells, and much more. There has been over \$4 BILLION paid out to those who have suffered vaccine injury and/or death. Vaccine manufacturers also cannot be held liable if their product harms or kills an individual thanks to the NCVIA of 1986. There have been ZERO double blind placebo safety studies done on vaccines. Vaccines are not a one size fits all and absolutely should not be treated as such. Even the Supreme Court ruled vaccines as 'unavoidably unsafe'. Where there is a risk, there MUST be a choice. Please vote no on HB 3063.
