

As a citizen of Wilsonville, I strongly oppose HB 3063. My daughter is not vaccinated and that is by our choice of parents to not due to our religious belief and to trusting the advice of our personal doctor. Should this bill pass, our daughter will no longer be able to attend school. How is that fair to deny her right to education in Oregon because we as parents don't believe in vaccinating our child?

Removing the exemption is equivalent to modern day discrimination.
