

To whom this may concern, I am writing my concerns about Bill 3063. I personally believe people should have the right to choose to vaccinate or not. My brother's daughter suffers injury from vaccination and I do not believe that vaccinations are one size fits all. Forcing a person to inject substances such as formaldehyde, aluminum, and many of the other toxic fillers, into their bodies is a violation that is inhumane. So is denying them an education because they choose not to. Please do consider this Bill as a threat to our constitutional rights as American citizens.

Sincerely,
Jaime Sandstrom
