Subject: SB451

To The Committee on SB451,

I support the passage of this bill to establish eligibility for renewable energy certificates for Covanta Marion facility that generates electricity from the direct combustion of municipal solid waste.

I would also support funding for more facilities like this in place of funds used to implement HB2020 which is waste of taxpayer dollars.

These facilities make sense as they are a cleaner solution that can be located closer to larger urban areas that create large amounts of combustible waste.

Sincerely,
Carla Pletka
