

Dear Legislators,

I am writing as a registered voter (Washington County) to voice my full support of the proposal for Taylor's Law.

We are in an opioid crisis and need to take broad and swift measures to mitigate further, tragic loss of life, due to not just the risks of addiction but the additional risk of lethal, unsuspected death doses of fentanyl.

Please support "Taylor's Law" to punish dealers of drugs that result in death with up to 5 years in prison.

At that, 5 years doesn't even seem like a tough enough deterrent, but it would certainly be tougher than current omission of such laws.

We grieve for the Martinek family and the loss of their beloved Taylor. With all the effort and resources utilized, they still were not able to protect their son from deathly narcotics.

Further, a year ago, another friend of ours loss their son, Brian (Clackamas County) again from a dosage he thought he could handle, which actually was a lethal dose of Fentanyl.

Again, I am in full support of moving this law forward in Oregon.

Sincerely,

Donna Morrow
