Re: [SB 508] I OPPOSE [SB 508] as written.

I oppose **[SB 508]** for it does not contain the need to review the Renewable Portfolio Standards (RPS) for the following reasons:

There are two (2) dates that I am concerned with hydroelectric facilities; those created before 1995 and those after 1995. I do not want to "reinvent the wheel" but at what time has there been a comprehensive review of all hydroelectric facilities with reference to the standards set forth in RPS? And, the RPS appears to require a more frequent review and updating as new proven technologies are introduced.

Clarification must be made part of the record describing the technologies associate with "other hydroelectric generating equipment" that produces electrical energy and the relationship of this equipment with meeting the standards set forth in the current RPS and whether or not amending RPS to accept these amendments is warranted.

Respectfully submitted,
/s/ David S. Wall
