

Members of the Committee

As a citizen who loves this state I feel compelled to express my concern regarding HB 2020 and the impact it will have on the public. Lower income families, those on a fixed income, and our senior citizens will have a difficult time shouldering the burdensome increases in energy costs. Businesses will also experience these burdens which will lead to increased prices and job losses.

Legislators have a fiduciary responsibility to the public which includes protection from harmful legislation. HB 2020 does not serve the public interest and I cannot support it. I hope you will all consider the harmful effects of this bill.

Thank you for your consideration
