

Feb. 23, 2019

Honorable Legislators,

I can't see how HB 2020 would improve my life in any way. It will impoverish me because the cost of energy and everything that requires energy for production will increase in cost. Our whole state economy will be in jeopardy.

As energy is rationed we create energy poverty and energy Poverty Kills people!

Do you expect those who can't afford the dire increases in living costs to do without such necessary things as heating in winter, cooling in summer, and food?

It is your fiduciary duty and obligation to do no harm!

I am retired and this bill is a war against my ability to survive.

No, I do not want it.
