

In regard to House Bill 2020

I am a retired southern Oregon widow on a very low fixed income. I own a manufactured home with natural gas furnace, water heater, cookstove & dryer. I chose this because it is efficient & economical. I cannot afford the increases this bill proposes.

Our elected officials have a fiduciary responsibility to benefit the state residents, not to harm or punish us. HB 2020 is punitive to natural gas customers & will harm me financially.

I am a long time Oregon resident & love living here. Please do not legislate me out of my home.

I say NO to HB2020.

I do not want state assistance.

I qualify for food stamps but do not accept them. I want fair pricing, which is already in effect.

Very Sincerely,
Pearl Kolodejchuk
