

I am a resident of Southern Oregon and I strongly support HB2020. I support this bill for many reasons and will mention only a few. I am the youth. I am constantly seeing my youthful peers move out of the area due to lack of good paying jobs after achieving education. This bill would create jobs that cannot be outsourced ranging from construction, engineers, road crews, designers, manufacturing, accountants, salespeople, & administrators to name a few. Rogue Valley desperately needs to update their transportation systems. We need systemic solutions to our wildfire crisis that grows out of control every year. It makes no sense to not pass this bill. Do right by the people of Southern Oregon and act now.
