

Dear House Health Committee:

Thank u for being such attentive and stalwart listeners yesterday for all the sincere, substantive, and moving testimony shared yesterday. I did not get to testify but it seemed so many people said so many very important and relevant things that mine could be shared later, maybe the next time a dubious unwise attempt to limit our ability to choose the kind and extent of health care we choose for ourselves and families. It seems that there is a false story line being purveyed in health care that does not line up with the reality people face everyday in our monopolistic system that does not allow substantial frepresentation of alternatives that are very well informed, science and experience based, and very cost-effective. I feel like I am being discriminated against daily for not being able to participate and getr a piece of the pie but live in poverty and exclusion although what I have to offer could be improving and/or saving dozens of 100s of lives.

There have been revolutionary developments and contributions to the field of public health, infectious diseases, and vaccinology in the recent just 3-5 years that we should be availing ourselves of and defer any serious decisions until we (you and the public, providers, politicians, etc.) can come to grips with the historic, scientific, statistical, and practical truths that have evaded the field for so long.

1) A COMPREHENSIVE OF INFECTIOUS DISEASES, PUBLIC HEALTH MEASURES, VACCINES, AND HUMAN COMMENTARY IN: "Dissolving Illusions: Infectious Diseases, Vaccines, and the Forgotten History" (2015) by Suzanne Humphries, MD, and Roman Bystryanyk--a very revealing extensively documented game changer by providing a nuanced history with plentiful graphs for this field.

2) FINALLY, A STUDY DIRECTLY COMPARING HEALTH OUTCOMES FOR VACCINATED AND UNVACCINATED CHILDREN FROM THE SAME DEMOGRAPHIC IN THE ANTHONY MAWSON ET AL STUDY DONE OVER 4 YEARS AND PUBLISHED IN 2017 AT:  
<https://www.rescuepost.com/files/mawson-et-al-2017-vax-unvax-jnl-translational-science.pdf>.

THANKS AGAIN FOR YOUR SERVICE AND PATIENCE (IT IS A VERY GOOD EXAMPLE TO OUR PEOPLE AND TO THE CHILDREN, WHO WE MUST PROTECT).

YOURS TRULY,

Chris Foulke, BA, BS, ex-NPT
