

My name is Kaypha Bonham and I am 8 years old I live in North Plains. I go to City View Charter School.

I heard they are making a law that says "kids can't go to school unless he or she gets all of their vaccines" and I can't get vaccines because my body can't process poison as well as other peoples bodies so my doctor told my mom not to give me vaccines anymore. But I want to go to school! I disagree that that law should be an actual law.

I really want to go to school as I said. I really want to go to school because I like my friends and how else will I get to see them? My school does a lot of field work like once we visited the St. Johns Bridge and one time we had an overnight fieldwork at a zoo. I learned a lot and I want to do more fieldwork in the future.

Again I really want to go to school. Please, I am asking you to not make this a law.

Sincerely,
Kaypha Bonham
