

As the grandparents of Taylor Martinek we strongly support the passage and implementation of HB 2797.

The death of Taylor has greatly graven his family, friends and the wide circle of his acquaintances.

Taylor was an outstanding individual that had many skills to provide to the world. He was loved and valued as friend by many within the community. He struggled valiantly to defeat the devil within but was sabotaged by the ease of procuring drug and the pressure from dealers. The dealers and providers of these illicit drugs need to be sufficiently held accountable. HB 2797 will help do that!
