

I am Yesenia Castro and I oppose HB 3063. I do not believe a child should be excluded from schools because the parent chooses to exempt their child from one or more vaccines due to religious or philosophical reasons. Please vote no on HB 3063. The separation between me and my government must be at the level of my skin. I must retain my right to refuse being injected with substances that can make me sick or even kill me. I must retain my right to refuse being an experiment. Removing my right to refuse is a violation of the Nuremberg Code, has my representative read that document recently? HHS failed to protect our rights and Bobby Kennedy even won his court case against vaccine safety because they have not done not 1 report to improve vaccination safety. The focus of public health is more important than high vaccination rates and low infection rates of a short list of infections. Taking away our rights will NOT stop the spread of diseases and only make the death rates increase. As most of you are 50+ years old, I can't help but to ask, didn't you have measles as a child? so why are you pushing this?
