

To all who will listen,

This letter is in support of the proposed Taylor's Law.

People Matter. Dealers should not be allowed to minimize the safety of others to get ahead. To put money over the value of people. We are fighting a battle of drugs, period. Yes, we have a long ways to go to eliminate the use and dependency on substance to hide and to numb this harsh world. On our way to eliminating this beast, we need protection from ones intentionally selling lies. Believing the untruth that money has value over a life. I ask that you listen to this story of heartbreak and realize this law plays an important role in addressing this devastating reality- people killing people.

Please listen. Please feel. Please act.

We are counting on you,

Lisa McDonald
