

Dear Joint Committee on Carbon Reduction

Please accept my support for HB 2020. As an entrepreneur in the space of clean energy, I can first hand attest to the jobs creation power of clean energy support at the state level. I have established two companies, the first of which was acquired by a Fortune 500 company, both of which are focused on bringing state goals around clean energy and carbon reductions to fruition. All industry is important, clean energy is the future.
