

We lost Brandon Scott Jenson July 15,2016 to a Haroin over dose . He became addicted to Oxycontin and when the pills became to expensive he went to Haroin. July 15 ,2016 he received a batch that was laced with Fentanyl. The two dealers were arrested on "The Len Bias Law" but were back in the community with in just a few months with no prison time. Our family stands beside you on this . Every step of the way. I know what when Brandon decided to use it resulted in his own death. I put that on him, but in turn dealers shouldn't be able to distribute substances that kill others without serious consequences.

The Goodman Family.
