

I appreciate your time on this Sparkling day. My name is Krista Corwin. Central Oregon is my home. I am an educated, highly motivated, small business owner and one of the best mothers you could ever meet.

I am writing this letter to you today after consulting with my trusted family doctor, physician and medical professional.

My doctor never reported my vaccine injuries.

My doctor told me that my brain swelled after having an adverse reaction. My doctor told me that I was lucky to be alive.

At the age of 29, I have suffered from convulsions, allergies, asthma, autoimmune disease(s), cervical cancer from my HPV inoculation that was supposed to protect me, and so much more. I will forever be haunted by my injuries.

My medical professional advised me to not inoculate my son because of his inherited gene, MTHFR. Because of his autoimmune disease. Because of his allergies. My family physician also educated me on the choices that I have. My family physician supported the decision and medical plan that we have made together.

I support my constitutional rights. I oppose HB3063.

I support medical consent and medical freedom. I oppose HB3063.

I support my body, my choice. This includes what goes into my body. I oppose HB3063.

I support making a decision that is best for my child and our family. My child is NOT for sale. I oppose HB3063.

My family and I contribute to our community and have a positive impact with our 509j school district (98% vaccinated).

Our community and school district will suffer without our participation. We already have a shortage on special education teachers and help in our classrooms. Your proposed bill will only make things worse. I oppose HB3063.

HB3063 goes against all of my religious beliefs. Have you looked at the ingredients? You should.

I oppose HB3063, because if you aren't already aware, getting a medical exemption in Oregon is next to impossible. But that's all part of the plan, isn't it?

I support a vaccine schedule that has been tested for safety and effectiveness. I oppose HB3063.

I support vaccine productions and manufacturers to be held accountable for vaccine injuries. I oppose HB3063.

I support all of the families that have fought, currently fighting and will continue to fight the Vaccine Injury Court. Those families will NEVER be compensated enough. I oppose HB3063.

I support the 2.6% of children in Oregon that are not vaccinated. I oppose HB3063.

Our time is valuable. I appreciate you having an open mind and taking the time to read this email. Epic timing of this bill.

Stuck in the snow,

Krista Corwin
