

Hi, my name is Jamie McLay, and I live in McMinnville, Oregon. I moved out here from Ohio in 2010. I am writing to support the HB 2020 - The Clean Energy Jobs Bill. I strongly believe that we need to do something about our environment. This bill will create more jobs and the transition to cleaner energy will decrease cost for people and businesses. It will also reduce pollution and grow opportunities for low income and rural communities.

I have two children that are ages 7 and 4. Over the last 9 years of living in Oregon, the summers have been increasingly warmer and dryer. There has been mass increase in the amount of fires and smoke pollution. Also, more and more people are losing their homes and businesses because of these fires. I want my kids to be able to grow up and have good lives moving forward, continuing to find ways to prevent further damage to our environment. Please think about our future and the future of the lives ahead of us. We need to do something before it's too late.

Thank you,

A concerned citizen
