

I am going to keep this simple and short. Please oppose HB-3063. We live in America where we should be allowed medical freedom. God made the body perfect, even if vaccines were safe they should not be mandated. You all should also realize if philosophical and religious exemptions are taken away so many parents will pull their children out of school. Schools will lose funding. Parents who oppose vaccines, or even oppose one vaccine, will homeschool they will not destroy their children's health with a vaccine that they find unnecessary.

Thank you
