

Dear Joint Committee Members and my legislators,

Thank-you for your work trying to get a workable, fair and just bill done for Oregon residents and the climate. I so appreciate your efforts.

While new to Oregon, I'm happy to support this wonderful land and it's people. Retired from 20 years in the Oklahoma Juvenile Justice System, I'm familiar with how impacted people in marginalized communities are by living near large polluters. While I understand these companies may need some consideration in phasing implementation, I urge you not to exclude them from this bill! Many manufacturers want to locate where a livable future is possible. Since implimenting cap and trade, California has outperformed Texas in manufacturing. Oregon deserves the economic boom that will come when we have money to invest in new jobs and infrastructure.

Current restrictions should not be rolled back. Please do not remove the Justice categories from the bill. However small our state's pollution to the entire earth, Oregon leads and must continue to do all we can for a livable just future.

Thank-you for your efforts.

Very truly yours,
Judy Wilder
