

Co-chairs Dembrow and Power, and members of the Joint Committee on Carbon Reduction,

I will be brief. You and I will likely not be around for the full brunt of Climate Change if we continue as we have been. The youth and their children will be. So, my message is in the declining window of the twelve years scientists tell us we have to do something, let's be amazing at it. Let's treat the Climate Crisis as just that. Be brave, be bold and be the solution. No deference to polluters.

Pass and support CEJB.
