#### Committee Members

I implore you, as an environmentalist and a progressive Democrat living in a small coastal town, do not destroy our town. Or the many small towns supported by mill workers.

This is no joke. Portland has a great economy and overwhelming legislative votes but makes rules for the entire state. That is going too far and demonstrates recklessness.

Oregon is a bright blue state with many wonderful progressive programs but the answer is not to collapse the economy of our town, or the town just down the road which is already on life support. That is going way too far without thinking things through.

Portlanders generally do not have the knowledge or experiences to legislate for rural communities. Even though citizens of these communities are mostly republican, they are still people with families and lives and children.

Put a cutout in the bill.... please!!!

Respectfully

Roy Weight  
Coquille  
Coos County
