

To whom it may concern,

I am writing today to speak the impact House Bill 2020 could have on the economy of Eastern Oregon. While I do believe the care of our planet to be of utmost importance, I also realize the fragile economy of my area (Ontario, Oregon). Please listen to our community leaders and their concerns about the impact of House Bill 2020.

Life here in Eastern Oregon is very different than Western Oregon. Living on the border, where businesses can easily transfer to, makes our situation even more fragile. Please make allowances for our county when considering this bill.

Thank you,

*Tammy Vogt*
