

I am a United Steelworkers Local 1097 member. Thank you for your continued efforts to oppose cap and trade in Oregon and be a champion for the pulp and paper industry and our community.

As an employee of the Georgia-Pacific Wauna paper mill, I'm proud that my company and our union values our environment, our community and our health. We are an energy efficient green mill that utilizes state-of-the-art control technologies. Our energy is generated from hydro, biomass, and natural gas.

To ensure continued economic stability in our community, it's vital for business to operate in a fair regulatory environment. A cap and trade program would do just the opposite by driving employers out of state to seek less burdensome regulatory conditions elsewhere.

You understand the challenges and your efforts to support our community is greatly appreciated. Thank you for standing up for rural Oregon! Please continue to oppose cap and trade and vote for Oregon jobs. Thank you.
