

Oregon ranks 10th on the prosperity of its residents compared to the 50 states and the District of Columbia. This rank is based on states' performance on economic measures for all residents but also accounts for racial disparities in outcomes. Relative to other states, Oregon's performance is about average for residents overall, but the gap between White residents and residents of color is narrower. These disparities however, no matter how extreme, have negative implications for the prosperity of Oregon. For example, the homeownership rate of White households is 66% compared to 43% for Latino households and 35% for Black households.

The Prosperity Now Scorecard features 28 policies that attempt to improve financial security outcomes. The Scorecard assesses whether your state has or has not adopted each of these policies. Oregon has adopted 17 policies.

About the Prosperity Now Scorecard

The *Prosperity Now Scorecard* is a comprehensive resource featuring data on family financial health, racial economic inequality, and policy recommendations to help put all U.S. households on a path to prosperity. The Scorecard equips advocates, policymakers and practitioners with national, state, county and city data to jump-start a conversation about solutions and policies that put households on stronger financial footing across five issue areas: Financial Assets & Income, Businesses & Jobs, Homeownership & Housing, Health Care and Education.

OUTCOME MEASURES

The *Scorecard* ranks states on 52 outcome measures from best to worst: #1 is the most desirable, #51 is the least desirable. The Outcome Rank is calculated by averaging the rank all of the state's measures and demonstrates how outcomes for all residents compare to residents of other states and DC. The Outcome Rank accounts for 60% of a state's Scorecard Rank.

RACIAL OUTCOMES

The *Scorecard* disaggregates data by race for 26 outcomes. The Racial Disparity rank is calculated by averaging the gaps in outcomes for White residents and residents of color for each measure. This average disparity is then ranked against the other states and DC. A Racial Disparity Rank of 51 means that the disparity is the largest compared to all states and DC. A lower rank indicates that the disparity is narrower than in other parts of the country, but even in these states, racial economic inequality remains problematic for the state's overall economic prosperity and resilience. The Racial Disparity rank accounts for 40% of a state's Scorecard rank.
