Dear Oregon Legislature,

As a constituent from rural Lane County, I would like to add my support to HB2656. Clear cutting and the use of herbicides/pesticides are detrimental to our water supply. Oregon waters have the potential to be pristine - some of the best in the world - but only if we protect this valuable resource. I fish, swim, raft, and kayak on Oregon waters. I also depend on healthy water for drinking, as all Oregonians do.

Thank you for supporting HB 2656.

Best regards,

Sandra Clark
