

I am writing to urge you to drop this bill. We do not have an outbreak of measles in any schools in OR. The entire basis of this bill is false, and is waisting taxpayer money, and all of your time. We have high vaccine rates in OR, well above herd immunity levels. Do not fix what isn't broken. Do not punish healthy children by holding their education hostage. This is a egregious overstep of power, and a blatant misuse of the "emergency" status for a bill. No one is dying of measles. There are a small handful of cases, no different from the average throughout the last couple of decades. Medical decisions must remain in the hands of individuals, not the State.

End this non-sense now.

Sincerely,
Jean R. DeFauw, Mother, Business Owner, Teacher
Southern OR
