

Gentlemen:

I am writing to you today to ask you to Vote Against this legislation. Please do not succumb to the outside influences that affect the people of your district as well as the entire state. We need ***responsible*** Forest Management. We Do Not want to end up like California, burning out communities due to lack of carefully thought out management of our great forests which provide jobs to thousands, in turn providing a viable tax base for our county as well as the state.

Lane County has been devastated by outside interest banning logging, banning road building. Without roads, firefighters have no way to access the burn areas. We the People ask you to VOTE NO on this legislation. NO ON HB 2656.

Thank you for your time
Your Business Matters!
