

updated with name.

My family and I reside in District 35. We are opposed to HB 2220.

There is no epidemic to state "declaring an emergency" propaganda on this legislation.

In April 2018, OHA provided information to Governor Kate Brown showing "high vaccination rates for all school required vaccines".

Per OHA, there has never been a decline in MMR vaccination rates in Oregon. 95.6% is the CURRENT MMR vaccination rate for k-12.

Dentist may NOT be trained to recognize, allergies, reactions and side effects of vaccines and furthermore do not have the appropriate number of medical doctors OR proper equipment in their offices to treat "onset anaphylaxis" which could occur immediately after administration of injection. (See Pub Med reference)

Onset of anaphylaxis to stings or **allergen injections** is usually rapid: 70% begin in < 20 minutes

<https://www.ncbi.nlm.nih.gov/pubmed/15025394>

The MERCK MMR vaccine inserts states  
"Anaphylaxis and anaphylactoid reactions have  
been reported as well as related phenomena such  
as angioneurotic edema (including peripheral or  
facial edema) and bronchial spasm in individuals  
with or WITHOUT an allergic history".

Please say No to HB 2220

Alicia Turner, Oregon
