---

Dear Committee members:

I live in the coast where my job and my passion is working for healthy salmon, clean, abundant water, and flourishing communities with a high quality of life.

Oregon's rivers and streams are essential to what I love and these resources must be sustained with high quality, ample water.

I support full funding for ODFW's Water Quality and Quantity Program (POP 123). The program must be sustained and enhanced with additional funding. Especially in light of the changes we're already seeing due to climate change-this program is more important than ever if we are to maintain salmon and other cold water species.

Please fully fund this program.

Thank you.
