Hello, I am in support for more funds to be appropriated for State police to enforce and protect wildlife and wildlife habitat from poachers.

On another note I am absolutely against any ODFW funds to be used to trap scapegoat and kill sea lions on a Superfund site under the fictitious guise of protecting toxic fish in a Superfund site.

In addition why is this not a public hearing -- ODFW is NOT meeting their mission statement and nor are they protecting wildlife that are not sold off for mere sport killings--- so de-fund this corrupt administration and increase funding for enforcement!!!!

Moreover ODFW just went to electronic licensing so there are many opportunities for humans now to hack this system --- to increase poaching and with no enforcement worries -- and currently this electronic system removes biologists from the field.

In closing, Rob Davis an investigative journalist with the Oregonian has written a four part expose on how lobby money dictates to ODFW not sound science --ODFW administrators continue to break the laws of the ecology and for dirty money they throw the marbled murrelet and all other wildlife under the corporate sport killing bus. (please see Rob Davis's expose in the attachment)

Hope this is helpful
