

Dear Committee on HB3063,

Please look at the MMR package insert. It proves that this vaccine has not been tested. Here is a direct quote:

"MMR II has not been evaluated for carcinogenic or mutagenic potential, or potential to impair fertility".

I am wondering whether you are aware of this. It seems so outrageous that any human being could consider forcing this on another human being. I look forward to your thoughtful response.

Kind Regards,  
Patrice Lowes
