

I do not believe it is anyone's right to inject me on my child with anything, I do not consent. If we give up this Liberty, where do we draw the line? Who decides to add more vaccines to the schedule? Who's on that board, do they have any conflicts of interest? Does anyone on this board have any conflicts of interest? Why is this not something we vote on? Is it wise to mandate something that is for-profit? Are the vaccines going to have a set price or once they mandate it will the companies raise the price of vaccines? How much will it cost the tax payers? Our founding fathers would not approve of this, and any soldier who fought for our freedom. This is America land of the free! Please at the very least watch the deposition from January of 2018 of Dr. Potkin who is the leading Authority on vaccines before you make a decision. If it's measles you're concerned about, consider just mandating that one vaccine. People can wear a medical mask if they're concerned about contracting diseases. In Japan and China this is commonplace. People traveling out of the country to high risk measles areas could be mandated to vaccinate. There are so many more solutions than mandating, I'm sure we can figure it out.

Thank you for not mandating that my child be injected with poisonous toxins and bits and pieces of animal and aborted babies DNA.

Mother-of-two registered voter concerned citizen proud Oregonian.
Savannah Booth
