

Dear Representatives: Please know that you are willfully defying the wishes of your constituents as you make this vote: if you pass this bill forward. You are letting us down. The 31,000 children who have exemptions in Oregon, have them for very important, well considered reasons.

Remember that only 11 people (mostly adults in their 30s) have died from measles in the USA in the past 20 years. The rates of vaccination HAVE NOT CHANGED in the past 10 years or more. There is NO DECLINE in vaccination rates. There is NO PUBLIC HEALTH EMERGENCY.

Ask yourselves what are you afraid of? What is motivating your fear, your anxiety about measles?

The root cause of all measles death is malnutrition and lack of Vitamin A. Simple. What we didn't fully understand in the 1920s-1960s, we know now. Vaccination is not the cure for measles deaths. Nutrition is.
